

Recent report

Dear Peace Fans, I am very sorry to keep you waiting.
There were quite a lot of request from Peace Fans that they want to know how Peace is doing more frequently, but I really could not have enough resources to do so, please forgive me.

Here is latest update.

As you know that Peace has the disease called "Epilepsy", so she needs to take medicine by fixed schedule to avoid fits. And also she needs to have medical check ups twice a year (every six month). To have this medical check up, she also need to have an anesthetic shot due to draw blood to check her liver condition.

Last April (April 2007), we did medical check up, firstly we scheduled it on 04/16/2007, but she had an epileptic fits just before we gave an anesthetic shot and after we gave her a tranquilizer.
Due to these fits, we decided to stop drawing blood for the check up.

We re-scheduled check up on 04/23/2007, and that time Peace did not have any

trouble to have anesthetic shot, so we did draw blood and weighted her.

I always worry about the results of check up, but I relieved so much, because we did not find any troubled results.
But she gained much weight this time, I imagined that she gained weight,

but the scale showed much more than what I expected, her weight was 305kg. I think her best weight is around 260kg. There is a wise saying that the parents should have responsibility when their children over weighted. I felt sorry for her so with strong mind I decided to Peace to be on diet once again.

The first plan was to let Peace to work out with the Balance Ball which was one of present from Peace Fan. I hoped Peace to have slender body by this work out, but Peace was just play with it in the pool with so much fun.
So, I have to think about next method to have good diet.
With good patience, Peace will going to have slender body in someday.
